

# Virtual Summit Post Show Report

The 2020 virtual Rocky Mountain Green Summit and Workshop brought together over 300 building professionals, sustainability leaders and changemakers from across the Mountain Region and beyond to learn about embodied carbon, resilient communities, mass timber and indoor air quality.

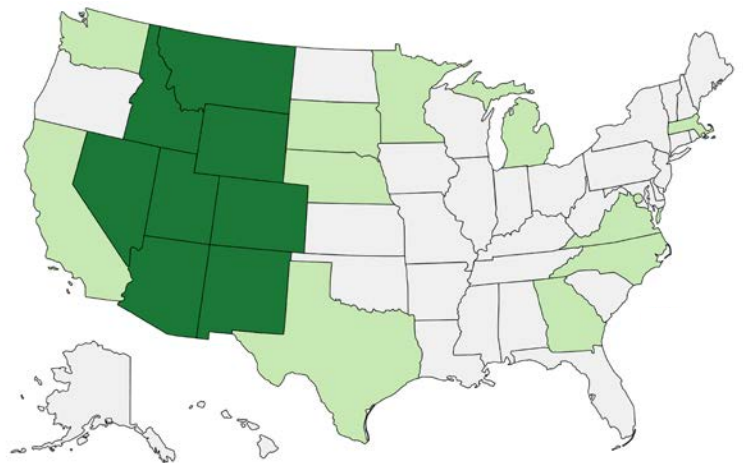

The success of executing a virtual Rocky Mountain Green was only possible with the support and hard work of speakers, sponsors, volunteers and participants. While the 13<sup>th</sup> annual Rocky Mountain Green was unconventional, we look forward to the day we can come together in person to learn, network and celebrate the excellent work of our community.

**302** Attendees

**13** Speakers

**6** CE Credits

## All Mountain Region states represented!

**“Congratulations to the RMG organizing team for pivoting so quickly and ably pulling off a successful summit under strange and stressful circumstances.” – Virtual Summit Attendee**

**36% of participants attended Rocky Mountain Green for the first time in 2020**

**83% of attendees were Satisfied or Very Satisfied with their virtual Rocky Mountain Green experience**

**79% of attendees were Satisfied or Very Satisfied with the WebEx videoconference platform**

## Top Industry Sectors Represented:

Architecture  
Construction  
Government  
Engineering  
Interior Design  
Real Estate  
Finance/Insurance  
Professional Consulting
